

# Newport Blind Fabrics

Simplistic Elegance!

 Vision  
SHADES

Elegant and subtly textured, the Newport Blind fabric range provides the perfect answer when you are looking for the same colour and texture in Translucent and Blockout Window Coverings.

# Simplistic Elegance

Newport is constructed using a high grade, plain weave 100% Polyester yarn. It is durable, extremely stable and offers longevity to the finished Blinds. This ensures that they retain

their brilliant, crisp and elegant look for many years.

Newport offers a range of light to mid coloured Translucents, with each being partnered by a same colour Blockout.

This is particularly useful in dual Roller

Blind applications, where the Translucent finish can be used for light filtering during the day, whilst the Blockout provides total privacy at night. A further range of Blockout colours are also available in dark and stunning shades.

The Translucent finish allows natural light to enter a room, providing a comfortable, filtered effect. For complete light control, Newport is also available in a range of modern and dramatic Blockout colours. This finish is suitable for bedrooms, home theatres, corporate offices or areas where total light control is required.

Newport provides an excellent variety of Window Covering options and can be utilised in many Blind applications including Roller, Roman and Panel Glide Blinds.

Both the Translucent and Blockout finishes offer substantial Ultraviolet Protection from the sun, which dramatically reduces the amount of harmful Ultraviolet light entering a room. Ultraviolet light can cause the fading of or dulling of Curtain Fabrics, Furnishings, Furniture and Floor Coverings.

Newport Translucent and Blockout® have been tested by the Australian Radiation Protection and Nuclear Safety Authority (ARPANSA), for Ultraviolet Protection levels, with outstanding results.

Newport Translucent® offers between 96.0% and 97.4% Ultraviolet Protection against the Sun's harmful rays, while Newport Blockout® provides the maximum Ultraviolet Protection levels of 97.5% or more. Newport Translucent and Blockout® can be used with confidence, knowing it meets these stringent government guidelines for Ultraviolet Protection in Window Covering treatments.

CREATING THE

## *Fifth Season*<sup>®</sup>

Vision Shades are innovators in Blind Textiles, offering insulation and appeal through their wide range of Blind fabrics. Providing protection from harmful Ultraviolet sunlight, the Newport range includes colours to suit domestic and commercial applications.
