

# DesignerStyling DesignerCollection

# NEW

Eight ranges within one stunning collection.

To describe them in just one word is impossible – perhaps 'beautiful' but then 'versatile' might be more apt. In truth the fabrics of the Designer Collection are both beautiful and versatile.

Offering the very latest fashion colours, delicate Sheer patterns created with the capacity to present superbly in any form of Roller, Roman and Panel Glide Blind, you'll be overwhelmed by the possibilities both for residential and commercial applications.

*It is our pleasure to introduce the all new Designer Collection...*

Hampton™

## Lava™

There is a certain sparkle about this stunning fabric. While the range doesn't include molten reds and oranges, there is certainly something 'hot' about this new Blind fabric range. Think 1970s Lurex! Lava™ is all about the shimmer. This gorgeous Blind fabric successfully marries soft earthy tones with a gentle, somewhat mystical sparkle. Lava™ has excellent lay flat qualities, handles easily and falls beautifully in all three forms of Blinds: Roller, Roman and Panel Glide.

## Serenade™

Fleeting glimpses is all the minstrel can expect to see of his love, as he sings to her open window. Half concealed, she listens not daring to fully reveal herself, and so it goes for the Serenade™ range. This Blind fabric combines sheer and translucent outlines where visibility and light is controlled in slender vertical stripes.

## Cayman™

This delicately textured Blind fabric is all about classic styling. Clean and sophisticated, Cayman™ works in every situation where a natural, yet uniform presentation is desired.

Emporium™

This very clever Blind fabric has qualities that sit somewhere between a Sunscreen and a Translucent Blind. Visibility with daytime privacy, but then it also enjoys the translucent qualities that allow Cayman™ to offer better levels of privacy at night. Cayman™ is already proving a favorite for many who have had early previews of the new range.

## Hampton™ & Newhaven™

Simply stunning, the Hampton™ and Newhaven™ collections are Sheer, full view Blind fabrics with a very beautiful repetitive decorative feature. Hampton™ has a vine motif while Newhaven™ is resplendent in tulips. The delicate presentation of these truly beautiful fabrics really speaks for itself.

## Cadence™

Of the same family as the gorgeous Hampton™ and Newhaven™ ranges, Cadence™ may have been better named 'Decadence'. This truly beautiful fabric has all the hallmarks of a classic full view Sheer with a subtle horizontal background stripe highlight. We're certain Cadence™ will soon become a sought-after favourite.

## EcoBalance®

It's one of two Designer Collection fabrics that may be used for both residential and commercial application. EcoBalance® being a PVC Free Sunscreen fabric is the epitome of versatility and style. The weave presents a softly textured surface with a silky gossamer sheen. No wonder creases disappear without a trace. Oeko-Tex®, Ecospecifier and GreenGuard® certification and outstanding Fire Retardant qualities, combine to make this fabric an ideal choice across the board for architects and building specifiers, decorators and home owners.

## Emporium™

A stable mate for EcoBalance®, Emporium is the second range in the Designer Collection which is appropriate for both residential and commercial application. With its even, silk-like qualities Emporium™ has a glistening surface lustre and a soft yet substantial feel. As is the case with all Designer Collection Blind fabrics, Emporium™ has successfully paired beauty with practical benefits that deliver durable, long lasting and environmentally responsible Blinds that adds the 'Designer' touch to showcase homes and commercial premises.
